

Toronto Geospatial Career Fair April 18th, 2020

[GoGeomatics Canada](#) is leveraging its strong network of job seekers and employers to create Career Day events across Canada. After over 10 years of helping employers and job seekers come together with Canada's premier job and geospatial magazine, we are launching our annual series of career days. This year we will be hosting our second event in Toronto on Saturday April 18th.

Join us for the day at the **Delta Toronto East, 2035 Kennedy Road, on Saturday April 18th, 2020 for the Toronto Geospatial Career Fair.**

We will bring together local and regional talent from across the sector to learn about your organization and why they should apply for a position. As access to top talent becomes more challenging in a competitive hiring environment, these events are important for the growth of your organization.

Why your organization should participate:

- Establish your organization as a serious career opportunity in a very competitive market for top talent.
- Present directly to job seekers that are motivated.
- Quickly conduct on the spot assessment of talent.
- Mix and mingle with job seekers in both an informal setting at our GoGeomatics Meetup the evening prior, and in a formal setting the day of the career event.
- By participating in this yearly career event, you will support your current and future Human Resource needs which will lower your costs and increase your opportunity to attract top talent.

What to expect day of the event:

As an employer, you will have the opportunity to present your organization and relevant opportunities to all the job seekers. You will have a tabletop exhibit to take applications and meet prospective job seekers. This is a six-foot table with two chairs, with access to internet and a power cord upon request.

INQUIRIES:

Jonathan Murphy at jmurphy@gogeomatics.ca

Tessa Toutant at tessa@gogeomatics.ca

Here's what other employers had to say:

We consider this a big success from where we sit. It was definitely a worthwhile career fair for us considering that our technical positions are often quite difficult to fill.

- Human Resources Natural Resources Canada (NRCan) June 2019

Here's what some of our job seekers had to say:

The career event was more than introducing participants to companies and future employers, it provided participants with valuable tools to search for careers in multiple situations and contexts.

-Maddy, Ottawa

Confirm your participation at your earliest convenience as spaces are limited.
